DETAILED ACTION

1. Claims 1-42 are presented for examination.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 36 is rejected under 35 U.S.C. 103(a) as being unpatentable over Keener et al. [Keener] (U.S. Patent No. 5,701,514).
4. Regarding claim 36, Keener teaches a method substantially as claimed comprising the step of:

reading a rate limiting parameter value from a register [col. 7, lines 24-27]; and

enabling a transmission line driver at a rate between successive such enabling that is no greater than a maximum frequency determined from the rate limiting parameter value [col. 2, lines 9-15; col. 6, lines 16-21; col. 7, lines 24-43].

Keener does not explicitly teach that the transmission line is enabled. However, one of ordinary skill in the art would have recognized that enabling the transmission line driver would obviously imply enabling the transmission line.

Allowable Subject Matter

5. Claims 1-35 and 42 allowed.
6. Claims 37-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
